FAQ

About the data

- Absentee and Early Voting data comes from the NC Board of Elections. The data is updated daily at 5 am.

Progress Tracker

- This tab gives an overview of the number of ballots received, accepted and rejected by county. We've also mapped received ballots' statuses and rejection reason (when applicable) across the state to help identify potential geographical trends.
- NOTE: Affidavit Review Pending status only applies to overseas ballots.

Stats

- This tab breaks down the number of ballots accepted by various demographic trends. The data is filterable by various factors.
- NEXT STEPS: I'll add cross tabs for Harris support score and turnout score, to look at the number of ballots received by those two scores.

Rejected Ballots Tracker

- This table of data is mainly here for visibility, though the data is technically downloadable as a csv file.
- A separate Ballot Chase Tracker is available to keep track of rejected, chased, and cured ballots.

Historical Voting Data

- This page takes early voter records from previous election cycles and compares them to current early voter records. This allows us to spot anomalies in this year's early voting (such as an unusually high or low amount of rejections).

Flagged Errors

- While working with this data, we've noticed some data anomalies and have flagged them in this tab.
- NEXT STEPS: We are currently monitoring these data errors and the DNC is aware.
